

Integrated Energy Solutions

Working with AJ Energy Consultants will save you time, money and resources, thanks to our integrated approach and proven expertise. In addition to being fully accredited energy assessors, we are trained in architecture and engineering so we understand your priorities and specific requirements.

Whether you're working on a new build or retrofit project, we can help ensure that each stage runs smoothly. And while you can engage us at any point, the earlier we are involved the more we can do to assist you in meeting targets and satisfying the needs of the project.

PRE-PLANNING

- Energy Strategies
- Sustainability Statements
- Code pre-assessments
- BREEAM pre-assessments
- Daylight and sunlight assessments
- Initial M&E scheme design

POST-PLANNING

- M&E design
- Code for Sustainable Homes assessments
- BREEAM assessments
- SAP calculations
- SBEM calculations
- EPCs
- Passivhaus Certification

POST-OCCUPANCY

- EPC improvement reports
- Energy and sustainability audits
- BMS controls reviews
- Management and staff training

Why choose us?

Efficiency: We have the expertise and experience to advise on all aspects of energy technology, planning and compliance, which means you benefit from a single point of contact and a clear line of accountability. It also means that we can apply an integrated approach to every project, delivering the right solution, first time.

Easy to work with: Having trained as an architect, our director John Simpson understands the importance of maintaining the integrity of design. Our approach is to work as part of your team to deliver practical solutions that integrate with your vision.

Energy expertise: Our consultants are fully accredited assessors for BREEAM, SAP calculations, Code for Sustainable Homes, EPCs and air conditioning inspections. We work with you to turn the required 'tick-box' exercise into successful design features that will deliver genuine value and enhanced performance. Work is overseen by our managing director John Simpson, who is a Chartered Engineer, full member of CIBSE and an accredited Passivhaus Consultant.

Cost effective: As independent consultants we make recommendations based on suitability. We have access to the whole market of renewable technologies, and will always specify the solution that best fits your objectives. Furthermore, as consultants working outside the city, we have lower overheads and can be far more competitive.
